Cosmetic Treatment Menu

YOUR SKIN, OUR EVERYTHING

At The Skin Centre we understand that delivering quality cosmetic results is as much art as science. Our clinical team combines a deep understanding of skin health with the latest developments in aesthetic medicine. Paired with an artistic eye, we tailor each treatment to your skin and your goals.

The treatments below use advanced laser, light-based and energy devices, alongside other cosmetic skin treatments delivered by our clinical team.

COSMETIC CONSULTATION

\$150
redeemable on treatments

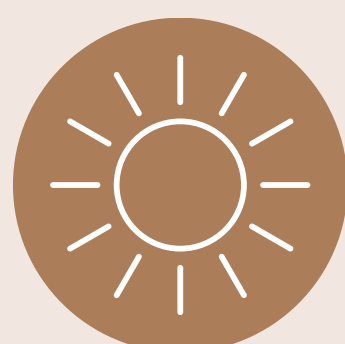

Tailored to your skin's unique needs with a Registered Nurse or Senior Dermal Therapist. Experience a comprehensive skin analysis using photographic imaging technology, laying the groundwork for targeted and effective treatments. Leave with a personalised treatment and skincare plan, skin diagnostic images and actionable insights into your skin's health.

**Required for all new patients interested in cosmetic treatments.*

COMMON SKIN CONCERN TREATMENT ICON GUIDE

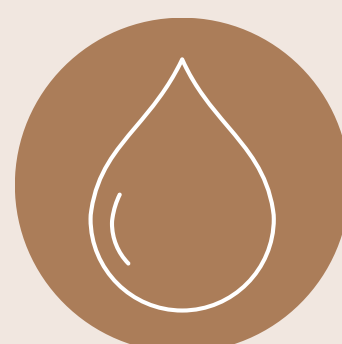

ACNE

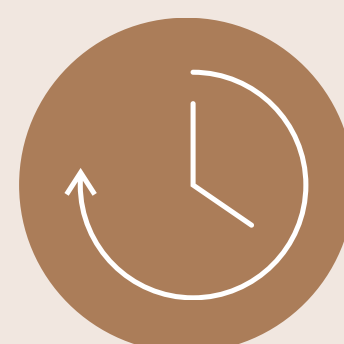

PIGMENTATION

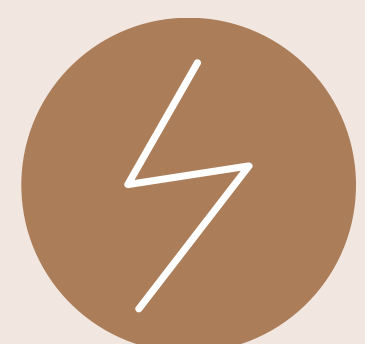

REDNESS

DEHYDRATION

AGEING

SCAR REDUCTION

LASER AND LIGHT COLLECTION

LASER GENESIS by Cutera

A non-ablative laser treatment designed to support skin rejuvenation through controlled heating of the upper dermis and stimulation of collagen. Best suited to those addressing facial redness, enlarged pores, uneven tone and texture, redness associated with scarring, or maintaining results as part of an ongoing skin health plan. Many choose to begin a course of treatments in the months leading up to a specific occasion. You can expect subtle, consistent results that build with each treatment. No recovery period, so you can return to your usual activities the same day.

Full Face	\$350
Add On	\$150

EXCEL V+ by Cutera

A high-power non-ablative laser with two wavelengths (532nm and 1064nm) that target vascular and pigmented concerns. It's used to treat vascular concerns (facial redness, rosacea, visible vessels, poikiloderma on the chest) and pigmented lesions (sun spots, age spots). It can also improve skin tone and texture and the appearance of redness associated with scarring. Improvements are generally seen within two to six weeks. Minimal downtime.

Full Face	\$350	Chest (Poikiloderma)	\$450
Hands	\$350		

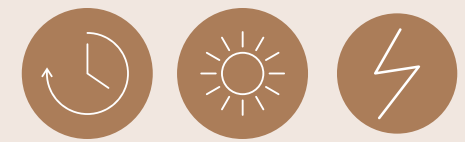

BBL HERO by Sciton

A light-based energy treatment that uses different wavelengths to heat the surface layers of skin and target pigmentation, redness and general skin rejuvenation across both the face and body. Well suited to treating larger areas such as the chest, back, arms and legs. Minimal downtime.

Full Face	\$550	Hands	\$250
Neck	\$250	Full Back	\$1,600
Decolletage	\$450	Half Back	\$850
Arms (3/4)	\$550	Legs (1/2)	\$1,000
Face, Neck & Dec	\$1,000	BBL Full arms up to shoulder	\$800

ENLIGHTEN PICOSECOND LASER by Cutera

Pico Genesis and Pico FX are laser treatments that use ultra-short picosecond pulses to improve skin tone, texture and clarity. Pico Genesis targets pigmentation irregularities such as sunspots, age spots, freckles and melasma, while stimulating collagen production for overall rejuvenation. Pico FX uses photoacoustic technology to address a broader range of concerns including acne scarring and fine lines. Downtime varies depending on the treatment and intensity selected.

Full Face Pico Genesis	\$450	MLA (Scarring)	\$450
Full Face Pico FX face	\$750	Pico Melasma	\$250 a session or \$1200 for a package of 6

INTENSE PULSED LIGHT (IPL) by Candela Nordlys

An IPL device with dual-filter technology that targets redness and pigmentation at the same time. It treats sun-induced pigmentation, facial redness, rosacea, visible vessels and poikiloderma across the face, neck, décolletage and hands. Best suited for combination sun damage and uneven tone across larger areas. Little to no recovery period, so most people return to their usual activities the same day.

Face, Neck & Dec	\$1,000	Full Face	\$550
Decolletage	\$450	Neck	\$250
Hands	\$250		

FRAX LASER by Candela Nordlys

A non-ablative fractional laser with two wavelengths that can be used separately or combined. The 1940nm treats superficial pigmentation and surface texture and wrinkling. The 1550nm reaches the deeper dermis to stimulate collagen and address acne scarring. Best suited to those wanting more significant resurfacing and acne scarring results, and willing to accept some recovery time. Downtime varies with the wavelength and intensity used.

(1550 ONLY)		(Combination 1940+1550)	
Full Face	\$990	Full Face	\$1,290
Neck	\$590	Neck	\$790
Decolletage	\$1,190	Decolletage	\$1,490
Face, Neck & Dec	\$2,190	Face, Neck & Dec	\$2,890
Hands	\$490	Hands	\$690

IPL + FRAX by Candela Nordlys

A combination treatment that pairs IPL with the Frax laser in a single session, addressing surface concerns (redness and pigmentation) and deeper concerns (texture, collagen and scarring) together. Best suited to those with multiple concerns wanting to address tone, pigment and texture in one visit. Downtime varies with the intensity used.

Full Face	\$1,190	Decolletage	\$1,390
Face, Neck & Dec	\$2,690	Hands	\$590
Neck	\$690		

AVICLEAR by Cutera

AviClear is the first laser of its kind for the treatment of acne. Engineered with a revolutionary 1726nm wavelength for all skin types, it selectively targets and shrinks the sebaceous glands (oil glands), eliminating acne at the source.

Face \$650

CO2 LASER by Sellas Cis F1 and Cutera Secret Pro

An ablative fractional resurfacing laser that removes damaged skin layers and stimulates collagen production for skin renewal. It addresses deeper concerns, including significant sun damage, scarring, texture and lines. Our most intensive resurfacing treatment, best suited to those wanting comprehensive rejuvenation results and often recommended after building up through lighter treatments. Involves a recovery period, which your clinician will discuss with you.

From \$1,200 to \$4,000

(Prices are indicative only and may vary depending on individual goals and treatment intensity).

CO2 + RF LASER by Cutera Secret Pro

An advanced combination treatment pairing CO2 laser resurfacing with radiofrequency (RF) energy to address both skin texture and firmness together. The CO2 laser targets fine lines, scarring and pigmentation at the surface, while RF energy reaches deeper to stimulate collagen in the underlying tissue.

From \$1,200 to \$4,000

(Prices are indicative only and may vary depending on individual goals and treatment intensity).

1927nm LASER by Lutronic

A mildly ablative fractional laser that creates controlled micro-treatment zones to resurface the skin and stimulate collagen, without removing the entire surface layer. It addresses fine lines, hyperpigmentation, sun damage and uneven texture. Best suited to those wanting meaningful resurfacing with less recovery than fully ablative CO2. Involves some downtime, which your clinician will discuss with you.

From \$750 to \$3,000

(Prices are indicative only and may vary depending on individual goals and treatment intensity).

ADVANCED SKIN COLLECTION

COLLAGEN INDUCTION THERAPY (SKIN NEEDLING)

Skin needling creates controlled micro-channels in the skin to stimulate the body's natural repair process, increasing collagen and elastin production. Red LED is included with each session to support skin recovery. Best suited to improving overall skin quality, texture and the appearance of scarring.

Face & Neck \$299 Add Decolletage \$119

TIXEL REJUVENATION

A non-ablative fractional system that uses direct thermal energy rather than light to resurface skin and stimulate collagen. Because it doesn't rely on light-based technology, it can be used on delicate areas including the eyelids and under-eyes, as well as the face, neck and décolletage, and is suitable across a wide range of skin types. Best suited to those addressing fine lines, firmness and sun damage, including in delicate areas other devices can't easily treat.

Downtime varies with the intensity used.

Eye Rejuvenation \$350 Face & Neck \$549
Eye & Perioral \$399 Add Decolletage \$450

RADIO FREQUENCY SKIN NEEDLING

RF skin needling uses micro-needles to deliver radiofrequency energy into the deeper layers of the skin, stimulating the production of new collagen and elastin. Because the energy is delivered below the surface, it's suitable across a wide range of skin tones. Best suited to those addressing skin firmness, texture and overall rejuvenation. Downtime varies with the intensity used.

Face

\$750

Face & Neck

\$850

LED

LED (light emitting diode) therapy uses specific wavelengths of light to support the skin. Red light is used to stimulate cellular activity and support collagen and skin recovery, while blue light targets the bacteria associated with acne. Best suited to supporting skin recovery and overall skin health, and often used alongside other treatments. No recovery period.

30min

\$89

Add On

\$49

REJURAN EYES

A regenerative treatment using polynucleotides (PN) to support the skin's natural repair processes, improving hydration, strengthening the skin barrier and stimulating collagen production. Best suited to addressing fine lines, crepey skin and the appearance of dark circles related to skin quality around the eyes. Downtime varies with the treatment.

Eyes

\$750

Important Information: The information provided in this Cosmetic Treatment Menu is general in nature and does not constitute medical advice. All medical, surgical and non-surgical cosmetic procedures carry risks and may not be suitable for everyone. Treatment suitability, risks and expected outcomes will be discussed during your consultation. Individual results will vary.

All pricing applies to services performed by Registered Nurses and Dermal Therapists only.
